

English.

In English this term we will be exploring Anglo-Saxon legends and extracts from Anglo-Saxon 'Boy'. This will be our inspiration for writing a narrative and newspaper article. We will explore Kennings poems, written in Anglo-Saxon times and performing them. Focus will continue to be on joining handwriting and good presentation in all written work.

Eagles Class Topic Map

Science

In Science this term we will be exploring light. How does light travel? How can we protect ourselves against the natural light of the sun? We will be using our working scientifically skills to make predictions, set up experiments and present our findings.

RE and World Views

This term we will be exploring holy week and what stories tell us. We will of course be looking at the significance of Easter too.

PSHE

This term we explore the theme 'Valuing Difference' alongside our Christian value forgiveness. In addition to this there will be some focus on our British value this term, Rule of Law..

PE

This term we will continue to develop our cognitive skills and physical balance. We hope to improve our communication skills, to work as a team and develop resilience.

Geography

We will be looking at our local area using ordinance survey maps, Google Earth and getting out with our compasses! We will look at human and physical features.

Maths

In maths we will be learning about unit and non-unit fractions. Year 2 will learn about finding a half, quarter and a third and apply their knowledge to problem solve. Year 3 will learn how to find fractions of an amount and how to calculate equivalent fractions. Then we will apply our knowledge to problem solve and reason.

We will continue to develop our mental arithmetic skills and will practice daily number facts and times tables.

Computing

This term we will focus on developing our coding skills to improve animations.

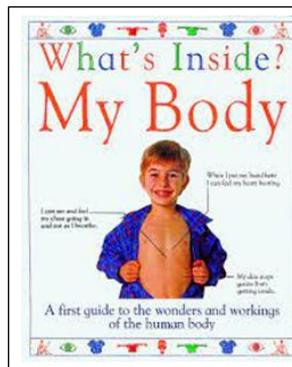

MFL

Mrs Hussey will be teaching French this term. We will be learning about animals and our pets. We will explore what Easter is like in France.

Our Sticky Knowledge

- Understand that humans and other animals have skeletons and muscles.
- Skeletons and bones support and protect body parts and along with our tendons and muscles enable movement.
- Recognise that different teeth have specific functions or jobs.
- I know how to care for my teeth
- Identify healthy foods and actions that keep my mind and body healthy.
- Understanding what's inside my body and what the major organs do.

Our Big Questions

What are the different parts of the human skeleton?

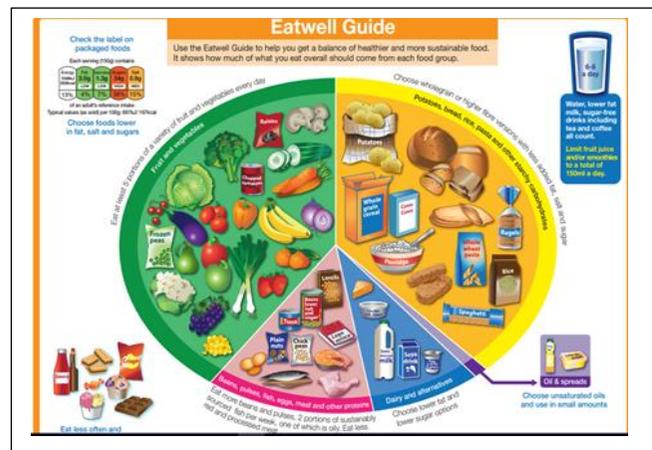

What's inside my body?

What do humans and **some** animals have in common?

What specific functions do different teeth have?

How can I care for my teeth?

Can I identify foods and actions that make me healthy and unhealthy?

Our Key Vocabulary

Skeleton- a frame that supports the body

Bones- hard white tissue that makes up the skeleton

Vertebrae- back bone or spine

Tendons-tissue attaching muscle to a bone

Ligaments- tissue that joins two bones together or holds a joint together

Joint-where two parts of the skeleton join

Muscles-tissue which can tighten to move or keep parts of the body in position

Internal – on the inside

External-on the outside

Nutrients-ingredients found in our food to help us grow, stay healthy and have energy

VOCABULARY
